Increase your impact as an agile facilitator

Forged from our real-life experiences

Our consultants often act as an agile facilitator for our clients. Teaching, coaching and mentoring teams and stakeholders as they adopt agile.

Facilitating agile involves a lot of mental juggling; the relationships, the flow, the ups/downs are all part of a team's agile journey.

We've collected all our experiences and knowledge to create a follow-on course from our Agile Master in Public Services.

A course that will boost your understanding, knowledge and skills of an agile facilitator.

Created with the intention of inspiring lightbulb moments through activities and stories.

Activities which are backed up by psychological theory and ways to practise new skills to facilitate agile teams.

Leave with a new found understanding of how to get the most out of your agile teams. And the confidence to try, reflect and iterate different techniques and approaches.

We are proud of what we do

## The skills you need to turn messy problems into meaningful opportunities.

Basis Training was established to meet our clients needs for high-quality, impactful public sector training at an affordable price point.

In 2010, driven by acute austerity, our clients told us, "we need to diversify our staff's skills to save money." We realised we could fill that knowledge gap – and fill it well – so we started developing our first courses to rave reviews.

Since then, we've made it our mission to build more and more courses in response to our clients' most pressing problems. We take those problems and turn them into meaningful opportunities by equipping delegates with a powerful mix of theory and frontline experience.
