- Delivered: Virtually or in-person

"Best course I could have done!" Head of Transformation, Haringey

Basis Training

An immersive training program

The Agile Master for Public Services is an immersive training programme for Transformation Managers who want to deepen their knowledge of agile, and apply agile in their work.

Do you recognise yourself, or your team members, in two or more of these points?

- You feel overwhelmed with the volume of budget cuts and trying to prioritise changes
- You need a more effective approach to deliver projects and ensure savings are realised
- You want to find a way for large groups to collaborate
- You need help to design services to meet your users' needs
- You want a practical approach to help your organisation to simplify and prioritise your complex change programmes
- You struggle with projects getting bogged down and need a way to deliver change at pace

If yes, then our Agile Master for Public Services will give you the understanding, core knowledge and confidence to apply agile to your complex change programmes.

- comms@basis.co.uk

We help Public Services tackle messy problems, co-delivering effective change.

What the training will give you in practice:

- You'll learn a sustainable change approach that shares the load - it's not all on you
- You'll discover a more effective way to deliver projects and secure savings
- You'll gain practical skills you can apply immediately through case studies and exercises
- You'll get accredited. This is the only agile training programme designed with and for the public and social sector, and it's accredited by the Public Service Transformation Academy

Use the training to start your team's awareness of agile. We build your team's confidence to start to adopt an agile way of working straight away.

It's important that the training mirrors real life. All our trainers have experience of using agile in public sector organisations, so the training is far from 'talk-over slides'.

The programme blends theory and practical exercises to develop a thorough working knowledge of agile and how it can be used to deliver savings in frontline services.

"Staff have become more motivated to drive the change and agile is now part of our everyday approach."

- Programme Lead, Medrwn Môn

Costs, add-ons and registration

The total costs for the training delivered online or in the room are £9,975 (excluding VAT). There are no additional or hidden costs.

You can also request a no-obligation quote for a training delivered in the room wherever best suits you.

Take advantage of our attractive add-ons when you register for several courses. To speak with one of us directly, drop us a line at comms@basis.co.uk.

Do you want our Agile Master for Public Services training but only have 6 people or fewer? We may be able to link you to another client so you can share the costs: comms@basis.co.uk.

A better way to deliver change and achieve meaningful savings

Delivering change in public services can be challenging as services are overwhelmed by budget cuts and rising demand.

Transformation teams feel it too, expected to deliver rapid savings while overwhelmed by the sheer volume of change and constant reprioritisation. In these fast-paced, complex environments, traditional project plans and timelines break down quickly.

Agile offers a better way

Agile helps save money by quickly testing ideas with residents and empowering staff to fix problems at the source. It also keeps effort focused on the most valuable work first, so time and budget aren't wasted on low-impact changes.

Agile helps you:

- **Tackle the right problems:** using different approaches for technical, complicated, and complex issues
- **Stay focused:** reducing multitasking and overload to make faster progress
- **Test and learn safely:** small-scale testing and reflection before scaling
- **Adapt quickly:** using real-time feedback and outcomes to shape your next steps

Agile brings structure – a way to bring people together to design and deliver improvements, save money, and build services that work better for everyone.

Who is this training for?

You might be:

- You are a transformation or change manager supporting teams to adapt their ways of working
- You are a programme or project manager wanting to simplify and prioritise your complex change programmes
- You are an analyst working to deliver a complex transformation or saving programme
- You want your project teams to deliver everyday improvements

What our clients say

"After a decade of using traditional waterfall, I did some other agile training but found it confusing. This course made everything click. Clear delivery and practical examples helped me apply the tools right away. A really worthwhile couple of days"

- States of Guernsey Change Team

"At first, delegates were confused but then it clicked. The training was an Agile project. Delegates had been assigned roles in a simulated Agile team, and without hours of theory, they just got it. Genius!"

- HR and OD Team, Homes for Haringey

"I've done several Project Management courses and this one really stood out. It showed how to engage people and get them excited about a new methodology. The trainers were knowledgeable and used relevant, (and outside the box) examples to bring it to life."

- PMO Officer, MOPAC

We are proud of what we do

The skills you need to turn messy problems into meaningful opportunities.

Basis Training is the only training company fully dedicated to public sector transformation. With 10+ years of experience, we understand how councils and the NHS really work - no corporate buzzwords, no generic "agile" fluff. Just practical, relevant training that makes a real impact.

In 2010, driven by acute austerity, our clients told us, "We need to diversify our staff's skills to save money." So we built our first courses and the response was overwhelmingly positive.

Since then, we've stayed focused on what matters: designing training that solves real problems. From frontline staff to leadership teams, we equip people with the skills and confidence to drive change where it counts.

We provide training for:
